

TALHA ASHRAF

SENIOR FRONTEND DEVELOPER

 +92-332-8116081

 ta.xit@outlook.com

 <https://www.linkedin.com/in/talha-ashraf-b57818273/>

PROFILE

Looking for a frontend developer role where I can apply my technical skills to create engaging user experiences. I'm eager to contribute to innovative web projects while continuing to grow professionally in a dynamic environment. I enjoy turning ideas into interactive applications and solving problems through clean, efficient code that users love. Ready to bring creativity, dedication, and fresh perspectives to a collaborative development team that values growth and innovation.

WORK EXPERIENCE

Tkxel

Senior Software Engineer 2021 - Present

Developed high-quality mobile and web applications from scratch using React, React Native, TypeScript, and their ecosystems, creating apps that are used by millions of people worldwide. Collaborated closely with team members and stakeholders, providing guidance and support to ensure project success. Mentored junior developers by sharing knowledge and best practices, helping them build their skills and grow professionally. Focused on creating user-friendly applications while maintaining clean, efficient code and fostering a positive team environment that encourages innovation and continuous learning.

Regbits

Senior Software Engineer 2020 - 2021

Developed and deployed a complete web application product for the company, working from requirements gathering through implementation using robust technologies. Built user interfaces with various frontend frameworks while developing APIs using Elixir, Phoenix, and Ecto for the backend infrastructure. Analyzed business requirements and translated them into technical solutions that met both user needs and business objectives. Mentored team members on best practices for code integration and development workflows, helping improve overall code quality and team productivity.

TECH STACK

React, Next js
React Native
Typescript/Javascript
Cypress, Jest
React Testing Library
Application Structure
Clean Architecture
Application Performance
Redux, Zustand
React Query
React Router-Tanstack Router
HTML/CSS
Elixir, Phoenix
Postgres

EDUCATION

Bachelor in Computer Science

Allama Iqbal Open University

2013 - 2018

Tiksom

Software Engineer

2019 - 2020

Started my development career focusing on learning and mastering fullstack technologies including React, Ruby on Rails, jQuery, Ajax, and Bootstrap. Built various web applications ranging from simple projects to more complex solutions as my skills progressed. Developed both single-page and multi-page applications while continuously expanding my knowledge of frontend tools and backend frameworks. Gradually took on increasingly challenging tasks and projects, growing from basic implementations to handling more sophisticated application requirements and learning how different technologies work together in real-world scenarios.

MAJOR PROJECTS

Cafe Zupas (<https://cafezupas.com>)

Cafe Zupas is a fresh food restaurant chain that specializes in protein bowls, soups, salads, sandwiches, and desserts, all made house-made from scratch daily. They pride themselves on using over 200 high-quality, premium ingredients to create healthy and flavorful menu options.

- Built major item selection and customization module - Developed a feature-rich, technically complex interface with smooth UI for customers to customize their orders. Code Reuse across all mobile and web
- Code reviews and quality assurance - Reviewed pull requests to maintain code quality and ensure best practices across the development team
- Pair programming collaboration - Worked directly with team members through pair programming sessions to solve complex problems and share knowledge
- Junior developer mentorship - Provided guidance and support to junior developers, helping them navigate technical challenges and improve their skills
- Complex UI implementation - Created smooth, responsive user interfaces that handled intricate customization flows while maintaining excellent user experience

Zimi (<https://zimi.life>)

Zimi is an IoT-based company that develops smart home automation solutions including light controllers, fan controllers, dimmer switches, and blind controllers. Their products can be remotely controlled through mobile applications and feature programmable timers for automatic device scheduling. This provides users with convenient remote control and energy-efficient automation for modern smart homes

- Built comprehensive admin dashboard - Developed a real-time monitoring system using React SPA to track device usage, view analytics, and debug system problems across all connected devices
- Created customer portal application - Built a complete customer-facing web app using React and its ecosystem, allowing users to schedule, control, and manage their smart home systems
- Developed complex device management interface - Designed and implemented sophisticated screens where users can control all their house devices with seamless backend synchronization
